

Merton Group UK Ltd

The Supagreen Paper Disposables range means no more compromise in quality or value

The desire for more environmentally friendly disposable paper products always used to mean a compromise in the quality and cost. The Merton Group UK Ltd saw massive potential in this rapidly evolving market and started to produce a bespoke paper disposables range. Manufactured from 100% recycled paper, Merton's aim was to create a high quality, greener solution.

The result is the Supagreen Paper Disposables range. Converted on site with the very latest production machinery, The Merton Group UK Ltd have invested £350,000 in a process which not only produces high quality disposable paper products regulated on site, but reduces the company's carbon footprint.

With all this inward investment in the Supagreen range, the next step was to ensure that value for money was never going to be compromised either.

The Merton Group UK Ltd has for the past quarter century built up a reputation for good business practice and excellent value for money. As a member of the CHSA and as an ISO 9001 approved company, The Merton Group UK Ltd can ensure that the Supagreen Paper Disposables range is no exception to the company motto,

"Cleaning and hygiene products that don't cost the earth."
