## TECHNICAL DATA SHEET

### LEMON BIOLOGICAL ODOUR NEUTRALISER – 0987

Enzymatic action, natural and effective odour eliminator. Powerful citrus scent gives immediate relief from foul smells.

- ❖ Breaks down organic soiling and stains
- ❖ Ideal for washrooms and use on carpets

#### USES:

Suitable for use on a wide range of carpets, absorbent surfaces and fabrics. Lemon Biological Odour Neutraliser may also be used in and around sanitary ware, drains, waste pipes and tiles surfaces to prevent unpleasant odours in the washroom and housekeeping environments.

#### DIRECTIONS:

Dilute 5 parts water to 1 part Lemon Biological Odour Neutraliser and apply directly to the area of soiling and leave to work (do not rinse).

Lemon Biological Odour Neutraliser's micro-organisms produce enzymes which immediately begin to digest the organic matter breaking down the stain and eliminating odour. The strong citrus fragrance provides immediate relief from unpleasant odours until the biological action is complete.

The biological action continues until the organic matter is completely consumed or until the area dries. The product may be re-applied (in stronger concentration or neat) as required without any risk of over use.

**NB: Do not use in conjunction with any disinfectants or sanitisers.**

#### TECHNICAL SPECIFICATION:

Composition	A unique biologically active formulation containing specialised bacterial stain and biodegradable cleaners
Appearance	Milky thin liquid
Colour	White
Density	1.000
pH	7.0
Fragrance	Strong lemon
Stability	2 years at ambient temperatures

**Safety: Keep out of the reach of children.**

Wear eye protection. If in eyes rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get immediate medical attention.

**Contains Benzisothiazolinone – may produce an allergic reaction. Causes serious eye damage.**
